

CHILD CARE CHECKLIST FOR PARENTS
Choosing Child Care for Your Loved One(s)

Selecting child care for your child is a big responsibility. The type of care that your child receives during the day will impact the type of person he or she becomes. The following is presented to you to use as a guide in evaluating the child care arrangements for your child. It is just that – a guide. It was developed using state licensing and registration requirements. Using this and other considerations, you as the parent, must decide what you want for your child.

As the parent, you should visit the child care facility several times before deciding to allow them to care for your child. Visit at different times of the day and go unannounced. If you are not welcomed into the facility, be concerned. Stay and observe what the children are doing. Watch and listen to how the adults talk to the children. Listen for the sounds the children are making. Do you hear laughter, questioning and conversation or do you hear shouting, crying and silence? How do you as the adult feel while you are there? Do you feel respected and welcome?

How Does Your Child’s Day Care Rate?

The following is a checklist of observable behaviors to consider when selecting a childcare facility for your child. Go through the checklist and record either yes or no beside each item. Make yourself notes in the comment section. You probably will not see everything the first time you visit, so plan on several trips.

Count the number of yes marks that you have recorded. Then compare the number to the ratings below:

Total “Yes”	Recommendations
45-56	This child care arrangement appears to be following practices that most Early Childhood professionals feel enhances the positive development of young children.
35-44	This child care arrangement is doing many things that advocates for young children feel are important. Ask the provider about the items you checked no on to begin a conversation to help you decide how important these items are to you.
25-34	This child care arrangement is not following practices as established through research on what is best for young children. Use the checklist to talk with the provider to determine if improvements can be made.
Less than 25	This child care arrangement is perhaps minimal in meeting the needs of young children.

This checklist is to be used as a guide and is not an endorsement of any program. You as the parent are responsible for any decision regarding childcare arrangements for your child. This checklist is provided by Imagine Nation Learning Center as an aid in your search for child care.
